## PHI EPSILON PHI

Phi Epsilon Phi sorority was originally founded at Norwood High School. The Beta chapter came into existence at Hughes in November of 1950. Barbara Angel, class of '51, was voted the first president with a membership of five. This increased rapidly with the initiation of girls from both Our Lady of Angels and Hughes High Schools.

Their purpose has always been to create lasting friendship among themselves, to afford members the opportunities to provide their high school days with gay times, and to help less fortunate people in every possible way. One of these projects includes a trip to the Union Bethel in order to distribute clever gifts to the children. The girls were touched by this gratifying experience and they felt the closeness of their sisterhood with pleasure.

## PHI SIGMA DELTA

Four lustrous pearls set proudly upon a gleaming onyx background signify the girls who founded Phi Sigma Delta Sorority at Walnut Hills many decades ago. In 1950 the Hughes chapter broke away to become independent, thus allowing vacancies for new members. The constitution was then rewritten to limit the number of eligible rushees to be pledged.

Their annual "Mr. Popularity" dance has thus far been a huge success in building up the treasury and in providing a friendly competitive spirit in other sororities.

Blue and gold beanies along with matching emblomed sweat shirts are worn regularly by active Phi Sig members. Still another aspect of P.S.D.'s specialness is the tradition of giving jewelry to the graduating class.

Finally, Phi Sigma Deltas, above all, pledge loyalty, faithfulness, and sincerity throughout their sisterhood.
