

Social Studies

Hughes students learn the origin of many customs in Mr. Gray's sociology class.

Past eras and errors are the clues to the world of tomorrow. The Social Studies help us trace the rise and fall of civilizations so that our own venture into the world will be taken with an understanding of the pattern of progress. World History, American History, Economics, Sociology, American Problems, and Geography teach us man's relationship to his fellowmen and to his environment. The existence of our own way of life is dependent upon a citizenry willing to profit by the lessons of the distant and immediate past.
