

Health

Although the future remains unknown, there can be no doubt that good mental and physical health will be, as always, of prime importance. The Health courses at Hughes, required three years, acquaint us with the care of our own bodies, the fundamentals of first aid, and good health habits. Whether our future be one of space travel, military service, or less rigorous careers, this knowledge will be of benefit.

Driver Training

The Driver Training course at Hughes includes both classroom instruction and "behind the wheel" training. Students learn the principles of safe driving, motor vehicle laws and are tested for co-ordination and aptitude on the road. Every student receives one course in Driver Education before graduation.
