

Foreign Languages . . . Preparation for College

Mrs. Jannet Murphy explains the geography of Germany to Tony Black, in the German class.

Foreign languages constitute one of the most interesting features of education at Hughestown. Courses are offered in Latin, German, French, and Spanish. College preparatory classes in French and Spanish start in the seventh grade and concentrate on the conversational aspects of the languages.

Language students gain insight into not only the writing and speaking, but also the history and customs of other peoples. Understanding other people's speech is the key to an understanding of their feelings and in the latter lies one hope for peace in the modern world of atomic bombs and space rockets.
