

Engineers of tomorrow are trained in Mr. Keller's mechanical drawing class.

Hughestown Provides Good Draftsmen for Industry

EDGAR HARE
ROBERT KELLER

The Mechanical Drawing Department of Hughestown proudly boasts of having the best equipment in the city. Under the excellent instruction of Mr. Robert Keller and Mr. Edgar Hare, a resident of Hughestown will be well prepared to enter the field of engineering or architecture.

The first year of drawing is devoted to the basic fundamental aspect of construction. From here a student may enter a more advanced course in engineering or architectural drawing. If a student undertakes the study of engineering drawing, he will learn how to design gears, sockets, and threads, make blueprints, and use the drafting machine. If, however, he chooses architectural drawing, he will design and construct models of buildings.

Each year there are several contests for students of drawing with Hughes usually receiving several awards.

Pat Kenney gets assistance from Mr. Hare in fourth period Mechanical Drawing.
