

Experiments and Lively Programs Attract Many

The Junior High Science Club is sponsored by Miss Helen Betty Newman. She has been head of the club for twelve years. Miss Newman has many enjoyable hobbies, which include making many of her skirts and other items in her wardrobe. She also likes working in her garden and making different flower arrangements.

Many prominent guest speakers came to address the Science Club. The December program about Christmas decorations delighted all the students. In January, Mr. Rohr, a pharmacologist at the William S. Merrell Company, discussed the scientific method of drug experiments.

The members of the Science Club meet on Wednesday, once a month.

Bottom Row: G. Mullikin, vice-president; P. Cutler, president; D. Lowman, treasurer; V. Harris, corresponding secretary; R. Henson, recording secretary. **Second Row:** M. Barnes, S. O'banion, D. Harrell, C. Berry, S. McKnight, R. Stanforth. **Third Row:** S. Rich, S. Johnson, E. Patterson, B. Rippetoe, S. Robison, R. Rogers. **Fourth Row:** S. Dammann, L. James, D. Edwards, B. Reid, E. Duesing, C. Campbell.

Mr. Rohr's white mouse doesn't scare Portia Cutler, president!
