Social Studies, Training-Ground for Good Citizenship

Mr. Heink lectures his modern history class on rationalism and emotionalism during the period 1648-1789.

A full curriculum of social studies subjects supplies all students with knowledge and appreciation of social conditions throughout the world, past as well as present. The importance of an informed citizenry is stressed.

Well-informed teachers use many kinds of visual aids to help students gain an understanding of socio-economic problems in today's world. The extra-curricular Junior Council on World Affairs increases interest in current events. Senior high students participated in a mock presidential election this year.
