

Knowledge of Mathematics, Increasingly Important

Several types of mathematics courses prepare students for a future more and more involved with numbers. Consumer Mathematics acquaints students with many different kinds of financial calculations they will have to make as adult citizens. Business arithmetic is necessary for students desiring

jobs in the world of business. Algebra, geometry, trigonometry, and calculus courses aid college-bound students, who plan careers in engineering, space aeronautics, computer work, or designing of buildings.

Mrs. McDaniel finds time to give individual help on a problem.

When Philip Morgan cries out, "I don't understand this problem!" Mrs. Muldrow offers some helpful explanation.

Lewis Hall and Jacquelyn Cassell learn that blackboard work is a 'must' in Mr. Morris' geometry class.
