

"Can you see them?" Miss Bacon asks the girls at their microscopes.

Mr. Bauer's biology class does lab work.

Mr. Himes helps T. Schott and B. Rippetoe with chemistry experiment.

Complex World of Science, Ever Changing in Modern Times

From physiology to physics, from amoebas to atoms, students have a world of science to study. In the Space Age, this changing field offers challenge even to the keenest minds, and Hughes is fortunate in having well-trained teachers, who enrich the courses with valuable experiences in

their fields.

Learning how to perform experiments in the various labs emphasizes the importance of following directions carefully, making exact measurements, and analyzing results objectively.
