

Teachers, as well as students, were called upon to state their views of Withrow this year. Despite the constant talking in their classes and tardiness of their students, they really have a good image of Withrow.

For example, Coach Jackson (10 years) says that Withrow's image has changed "for the better, but we still have to convey the message to the public even more." Other teachers agree.

Other teachers feel that Withrow's image could be changed. Ms. Greene feels that she could see "more intellectual curiosity in action." All in all, the teachers said that Withrow had a positive image. Let's see about the students.

*Crossing the Bridge to new images.*

*Ms. Greene: "more intellectual curiosity in action."*

*Basking in the glow of "love."*
