yearbook

## Something Old...Something New

In its simplest form, Withrow High School is an academic institution and has been since 1919. In a more complex form, Withrow is also not only a well of knowledge, but it also imparts useful life skills and friendship (and sometimes enemies) to those who walk the halls. Thus this old building has served for so many years earning a reputation for excellence continued today and throughout its long history. That is the part of our story that represents

## SOMETHING OLD.

It goes beyond this simple facade, however. On closer examination, one would discover three unique schools housed in one building. This is the part of our story that represents

## SOMETHING NEW.

And this is definitely something new! Within these separate schools, students can take advantage of various programs and opportunities. Among these are the Traditional Withrow High School Program where the rich Withrow tradition continues in its historical form. On the other side of the building is Withrow International High School which includes several programs within its walls including International Baccalaureate, International Business, and also the English as a Second Language Program.

Our story is not limited to just this! The third school in our building is the University School. This school is housed in the former vocational section of the Withrow campus. University High School currently consists of only freshman students, striving to do their best!

Where else in the country would you find such a creative approach to meeting students' needs. This is an idea whose time has come for it allows small student bodies of six hundred to be mentored and nurtured closely throughout our high school experience.

WELCOME TO OUR WORLD!!!!  
THIS IS THE STORY OF WITHROW HIGH SCHOOL 2003!
