An abstract geometric composition on a black background. It features several white circles of varying sizes and numerous straight white lines of different lengths and orientations. Some lines intersect the circles, while others are isolated. The overall effect is a dynamic, non-representational pattern.

# note

for many years the quality of workmanship and creativity in high school yearbooks has stood as a plateau. they have followed an almost absolute criteria for their format and in most cases have been dull and repetitious in their subject matter. over the past ten years the voluntary purchase of yearbooks by high school students has steadily dwindled from almost 100% sales to what has been experienced recently-50% or less, with the majority of books by the members of the graduating class. do not expect to find the "usual", as you peruse the following pages, but be surprised and we hope refreshed while viewing our attempt to present to the buyer (students) of the future, something a little more enjoyable than the books they find on library shelves, in attics, or under beds. what is attempted in the 1971 templar is a creative comprehensive photographic essay to present a record of the year as experienced by the class of 1971. all facets are represented in as concise a presentation as possible with additions and omissions entirely intentional but with no forethought to slight or favor any one person or group. we welcome your criticism and comments on the 1971 templar. please address all correspondence to the yearbook advisors, moeller high school, 9001 montgomery road, cincinnati, ohio 45242.

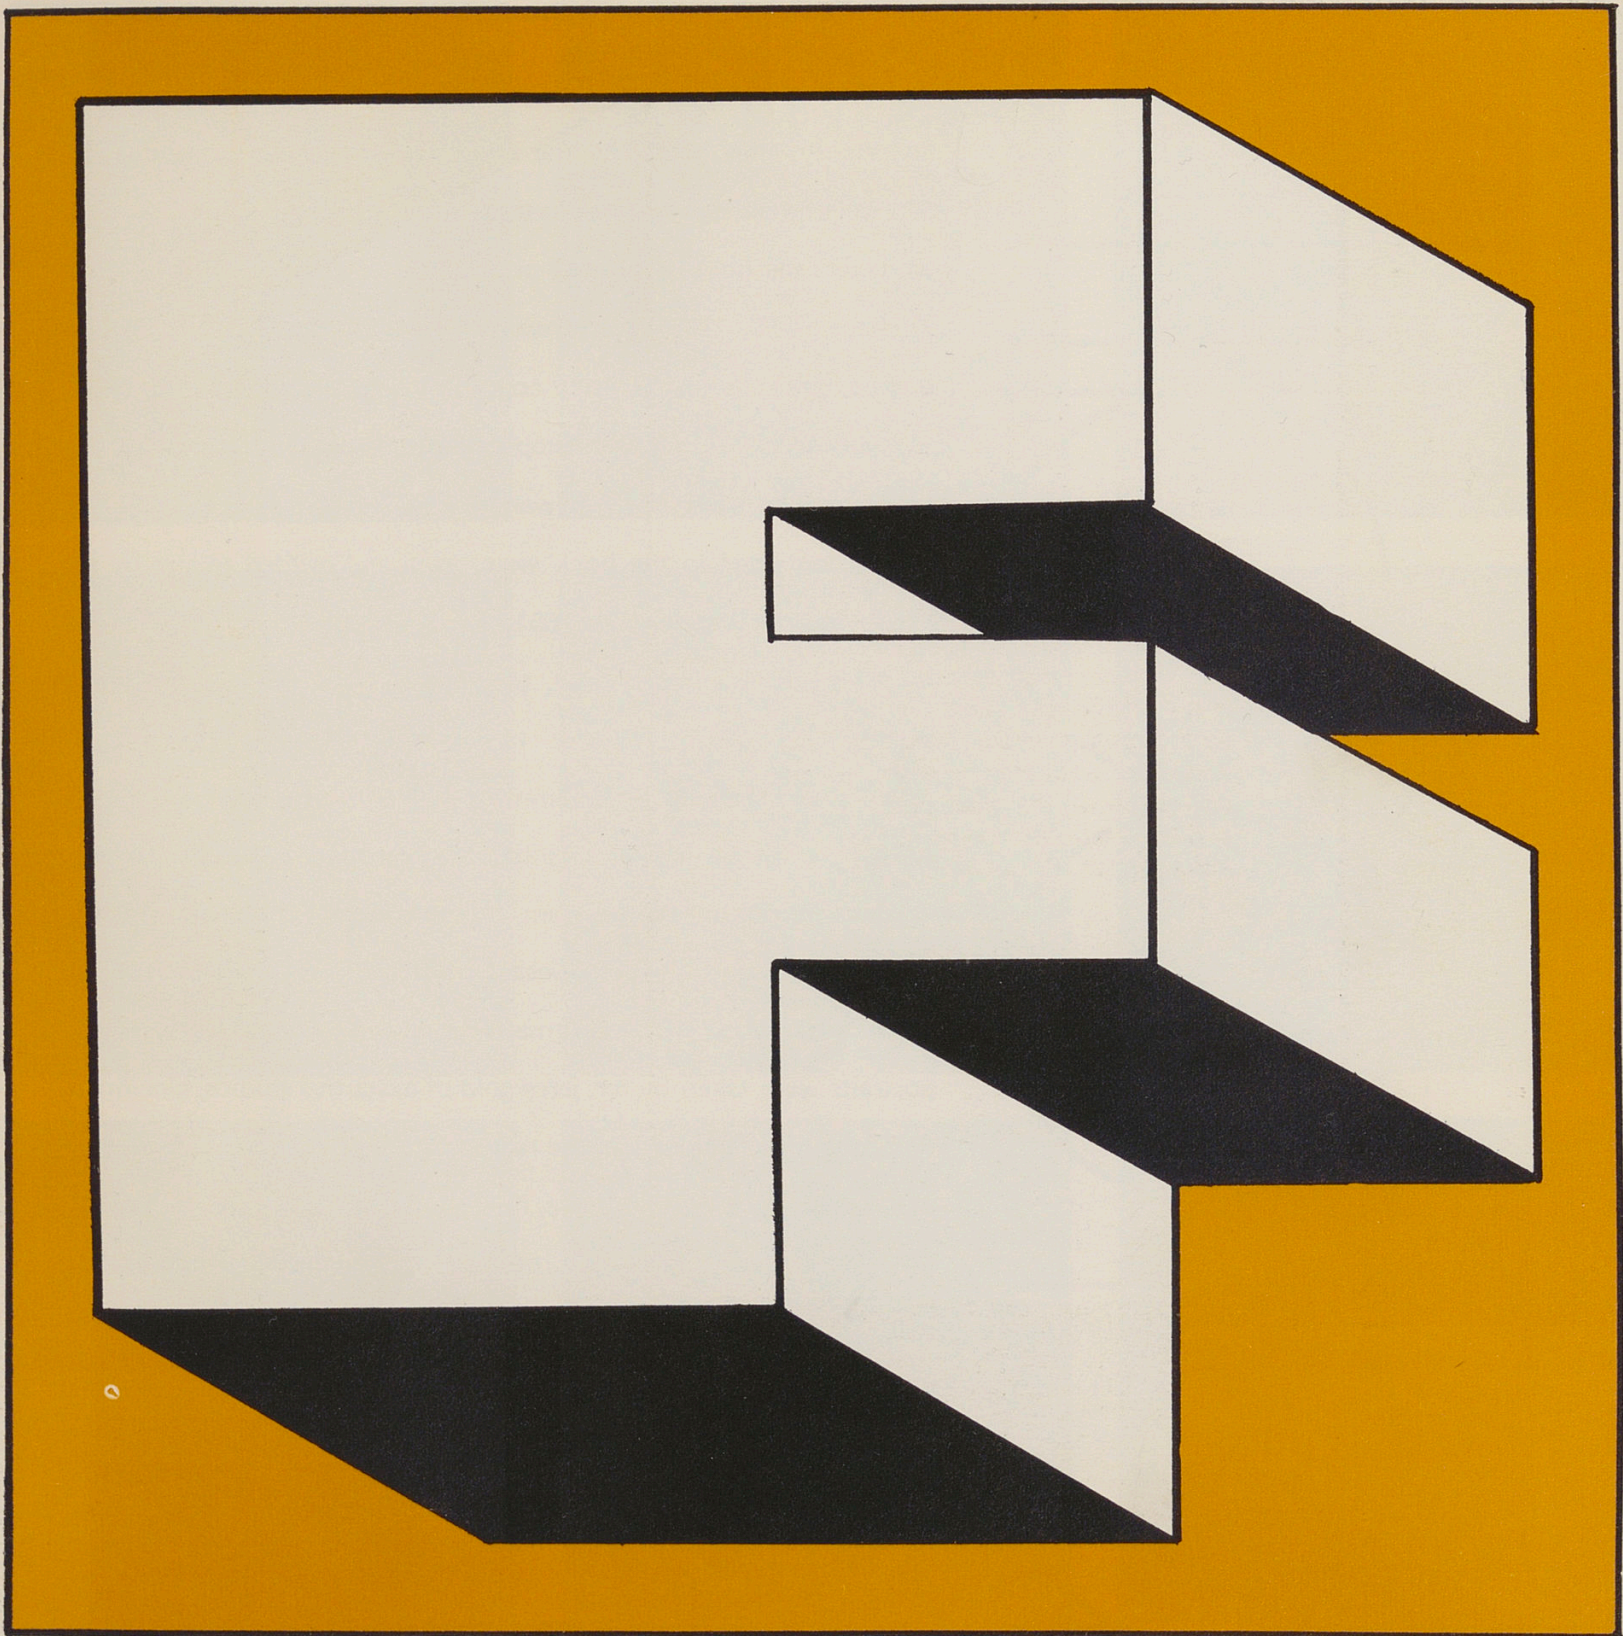

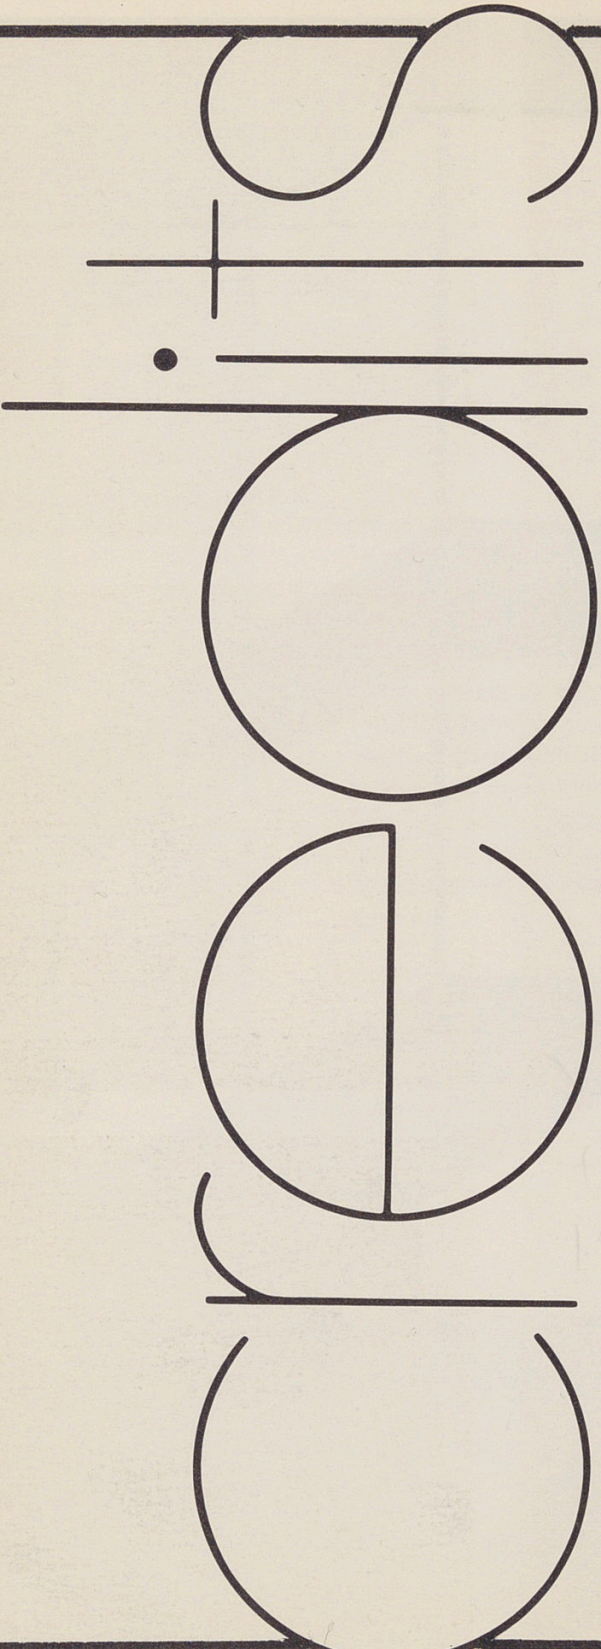

if all the seas were one sea,  
what a **great** sea that would be!  
if all the slums were one slum,  
what a **great** slum that would be!  
and if all the axes were one ax,  
what a **great** ax that would be!  
and if all the men were one man,  
what a **great** man that would be!  
and if the **great** man took the **great** ax,  
and cut down the **great** slum,  
and let it fall into the **great** sea-  
what a **great** IF that would be!

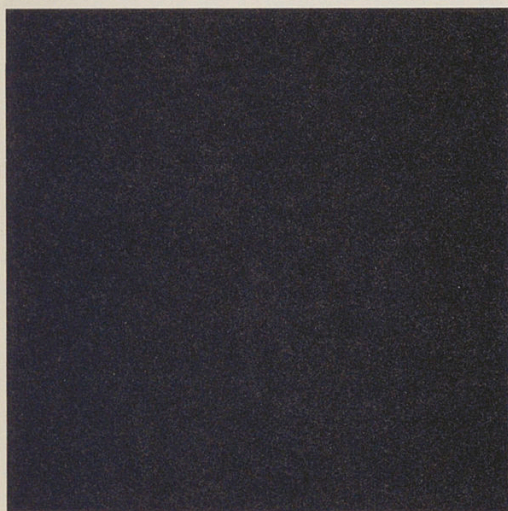

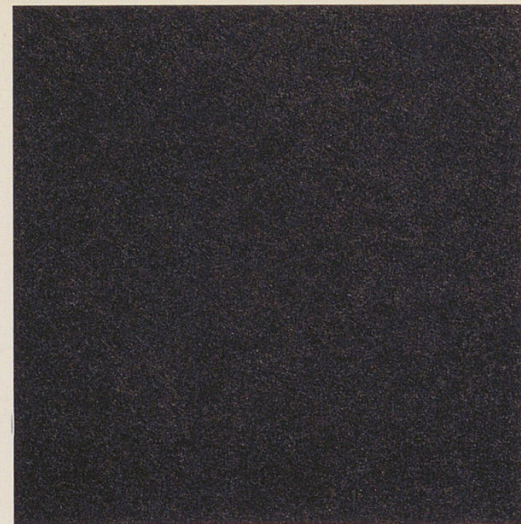

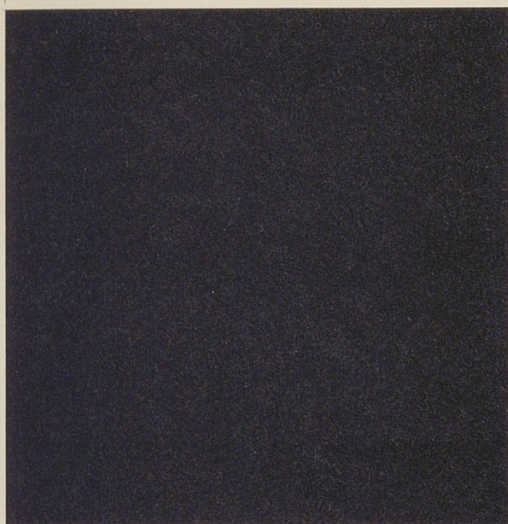

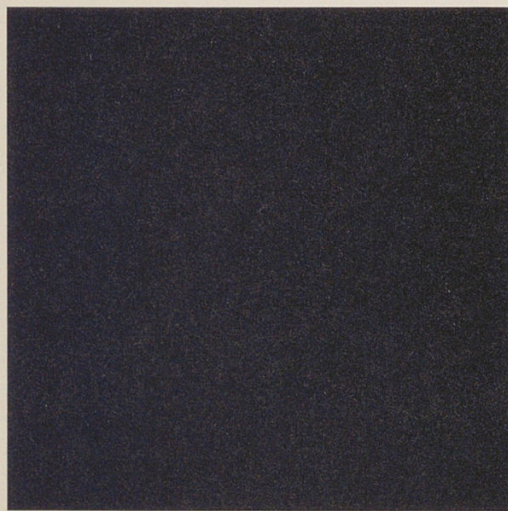

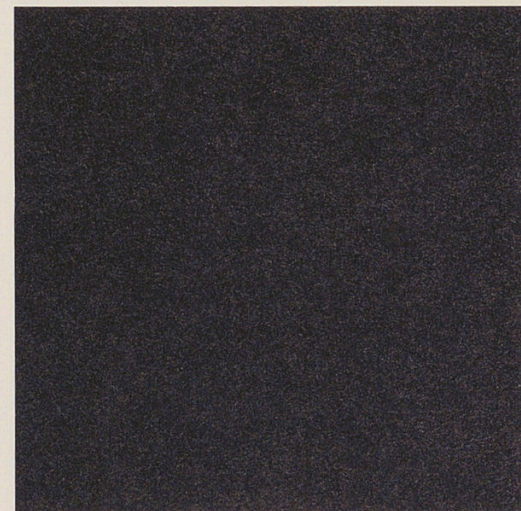

the 1970-71 templar was produced in the quantity of five hundred and eighty three copies by the anchor printing & lithographing co., 820 north main street, fort worth, texas, through the help of mr. paul whitaker. the book is printed on 100 lb. vellum stock, the headline typeface is l&c hairline and was set by typo-set inc., 2230 gilbert avenue, cincinnati, ohio. body copy is univers medium and was set by the anchor printing & lithographing company. moderators for this year's templar were bro. c. p. wanda, s. m. and tom levesay. all photographs contained in the book were taken and printed to size by pat mckenrick photography inc., 6512 roe street, cincinnati, ohio, mr. al hartman, mr. ralph baumann, tom levesay and the moeller photography club which includes: robert seifert, kevin kriener, steve spooner and mark greiwe. 35mm photography was used exclusively except for the faculty group shots. the poem which appears on page two was written by eve merriam. all other work is original. front and back cover design by tom levesay. front and back endsheets photographed by robert seifert. format and layout by tom levesay. senior portraits were taken by mr. jerry gold of executive studios, cincinnati, ohio. the compiling of athletic records was done by jim metz and jim schutte. the typing by jim metz, mike mack, bob mcewan, jim schutte, bro. wanda, and tom levesay. pasteup by tom montag, tom levesay and bro. wanda. subscription sales were done by tom montag, chip hueber, john rozic, phil runge, roy schlinkert, and hal rusche. our thanks to those faculty members, staff members, secretaries, students and alumni who thought a yearbook worth their contributions.

administration

# principal

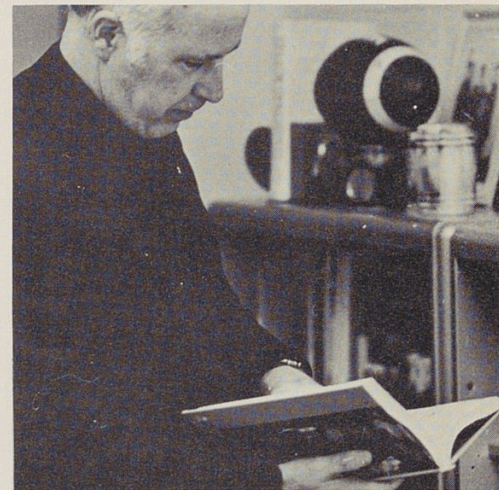

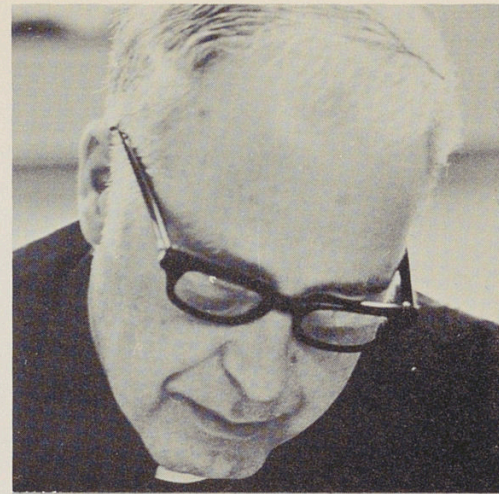

present-day moeller students are the beneficiaries of the great work of the pioneer students and faculty members organized by brother eveslage many years ago. looking over the record of achievements, one is truly impressed with all that has been and is presently being accomplished. today our students tend to take a lot for granted, but when time is taken to review the past, a new dimension enters the picture. organization, stimulation, direction, zeal, all played an important part in the whole picture of all achievements; but the frame of the picture is sacrifice - sacrifice of individuals for the common good of all. moeller is a great school because it was built on, and directed with, the spirit of self-sacrifice.
