

LIBRARY STAFF

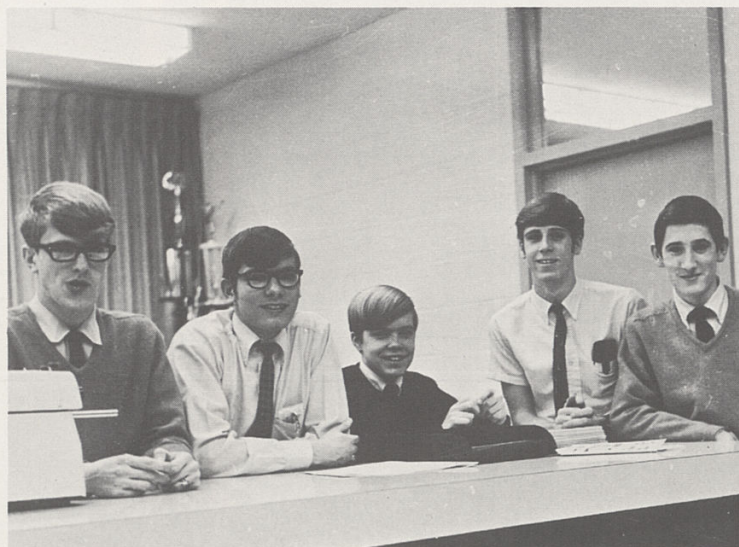

The library staff exists to help the students and faculty of Moeller to find information located in the library. This the staff does by preparing books for circulation, returning books to the shelves, taking care of back issues of magazines and keeping the shelves in order.

In preparing books for use, the members of the staff affix the ownership stamp and the pockets; they put the typed catalog cards into alphabetical order, preliminary to filing in the card catalog. During the past year they prepared over 900 books for circulation, returned hundred to the shelves, and located and replaced dozens of periodicals.
