

VOCATIONAL Education

Vocational Education can virtually change the life of a young adult. Students choose vocational education for many reasons. It provides a hands-on teaching approach which is better suited for many students. Vocational education opens career options for students and leads to well-paying fulfilling jobs. It gives students an opportunity to test their interests before choosing a career or investing in a college education. If students are college bound, vocational education improves their options.

Vocational education provides motivated skilled employees for our nation's work force. It is a vital part of our economy.

We are very lucky to have, at Withrow, a vocational program that allows our students to experience life.
