● "Ramshackle Inn," a three act mystery, featured an involved plot that centered around a bootleg whiskey gang and an impetuous old maid. A broken-down New England hotel, recently acquired by a retired librarian, was the setting for the eerie scene. The innocent, but rather forward librarian, found that her cellar was infested with characters of the underworld instead of with rats. From the resulting entangled mess a love affair flourished, two murders were committed, and the local sheriff, with aid from the F.B.I., cleaned up the human "vermin." The curtain fell on a happy ending for the play and on another successful production for the Withrow Players.
