

A prickly porcupine caused the owner of this battered hat serious trouble, which might have been prevented if he had attended one of the biology classes of Mr. Heger.

life; to apply with thought

Radius; luna; humerus; phalanges; metacarpus - some students of Miss Denner endeavor to learn the bones of the arm and hand, while others determine the characteristics of the skull. Another group looks at a chart and wonders if they will ever be able to spell such unpronounceable words.
