

Ever make a radio? Or a Duncan Phyfe chair? No? Well, neither have we. However, in the 1952 Ford Industrial Art Awards contest, there were 5,100 entries competing for prizes as high as \$100. The top winners also got a three day visit in Michigan to try for the \$200 Special Award prize. Among this year's winners were five Withrow boys.

to observe and improve and contribute

Pride was felt by these boys when they were presented the **Ford Awards** for their recent production of wrought metal, iron crowbars, and electrical devices such as a pen light, two induction coils, and a clock type motor besides.

While visions of chocolate sodas and cherry cokes danced through their heads, hungry students trooped to the square to enjoy this friendly hour of food and gossip.
