

or prove through experience, facts of past research.

The people count in a **classroom**; teachers and students work together in the give-and-take of a rousing discussion or a more serious "look at the record." Through daily routine, we grow better fitted to go out in the world as citizens, carrying with us the idea of democracy. In our language classes, we learn about other countries. Math classes teach us to use our minds logically, as we ponder theorems and square roots. Science classes help us to reason; memorization and accurate reading are also vital. In our history classes we examine events which have come before us so that we can better comprehend what is happening today in our chaotic world. In all classes, we learn from each other as much as from the teacher. Our opinions are important; we should not be afraid to voice them readily.

Girls carefully combine new elements. Surprising results may soon occur!

"If equals are added to equals, results are equal."
Eager future mathematicians learn their axioms.
