MRS. SUSAN HELGESON

Teaching career: 40 years
Sycamore career: 27 years

The best part of my job is teaching math. I love math, and I have always tried to help students understand it better. Often times that means encouraging them to come in for extra help when needed. After I retire, I plan to spend more time outdoors; whether in my yard working, or hiking, biking or walking in a park. Also, my husband and I have a cabin in the Upper Peninsula of Michigan on Huron Bay where I will spend at least 6 months of the year. My advice to students is to work hard to achieve success, but to also allow themselves time to 'be a kid.' They should not overload their schedules with too many AP classes, or work a job too many times during the week. Sleep is important, and they should also learn to ignore their cell phones for a while each day.
