Teaching career: 30 year
Sycamore career: 25 years

The best part of my job is my department colleagues and fellow teachers at SHS and Sycamore Community Schools who are so talented and so interesting. Working with students and learning about them, what makes them tick, and their interests, that has been great fun. Lastly, I enjoy sharing my passion for the study of people and societies. After I retire, we will be building a passive solar home that is completely off grid. We bought 10 acres on the west rim of the Taos Plateau in western New Mexico. Living there will be a great challenge. After the house gets finished I will probably do handyman jobs and manage vacation/ rental properties, but mostly be outside enjoying nature. My advice to students is to get involved and take advantage of all the opportunities provided to you. Don't worry about what others are doing or what they think, be confident and be yourself.
