

FIRST TECH CHALLENGE

In March, many students had the opportunity to compete at the state level for robotics. Two school teams, Aves Ablaze and Juniper, as well as one non-school affiliated team, INNOV8, all qualified for and competed in First Tech Challenge's virtual state competition. INNOV8 member **Kristin Close, 12**, said her favorite part about joining robotics is "the community [they] built up. It was very...supportive...and an encouraging environment."

LAUNCH DAY

Let the senior festivities begin! As the semester began to wrap up, launch day celebrated all of the seniors as they committed to their future university or other post-secondary education plans. Everyone signed posters showing off their decisions and enjoyed celebrating their future.
