

success story

A JVB Baseball player talks about what he thinks it takes to be successful in baseball.

There are a lot of skills needed to be successful. Of course, there are the game's physical skills, but another big thing is staying mentally focused and aware. You can't let one bad play change your confidence level because often you will be able to make up for it. You also can't lose awareness in the field because you never know when a play is going to come to you."
