Self expression based on the natural movements of the body and on certain definite technique, is included in Natural Dancing. The Dance Club was organized by students interested in dancing, music, and costuming, for the purpose of carrying on advanced and original work in Natural Dancing. One must have had at least a year's experience along this line in order to become a member of the Dance Club.

It has been the custom of the club to present a recital sometime within the year, showing the type of work accomplished. The recital includes some illustrations of technique, child rhythms, original rhythms, and some complete dances worked out by the club.
