

A New Science of Light is Born in an Attic Laboratory

GEORGE SPERTI, '23
Director, Basic Science Research
Laboratory

President Herman Schneider, founder of the Basic Science Research Laboratory, is shown in the upper center of the above group. Miss Elizabeth Shelow, in charge of certain phases of vitamin D work, is seen at the upper left. The physical chemist and physician of the laboratory, Dr. Francis Heyroth, '23, is pictured on the upper right, while John Loofbourow, '23, research chemist and physicist, is pictured in the bottom center. G. Park Goode, technical director, is shown at the left, operating soft X-Ray equipment built by himself. Miss Agnes Helmer, right, laboratory assistant, is demonstrating the new laboratory process of the formation of vitamin D.
