## Choritides

VIOLET BALASTRA .....*President*  
GLADYS STEVENS .....*Secretary*

The soft harmonies and beautiful tempos of music, transformed into graceful rhythm by the motion of the human body, is the ideal and purpose of Choritides, the natural dancing club of the University. Members desiring to join Choritides may try out after a year of experience in interpreting music by classical dancing. Through the free and flexible movements of the body a natural ease and grace is attained. The results of the year's practice are presented, along with original and child rhythms, at a spring dance recital.
