

## **Men's Vigilance**

### *Council of Six*

The Council of Six was organized primarily to direct the activities of the newcomers to the University. Their aim is to direct freshman vigilance in such a way that the freshmen will be properly introduced to a new phase of life. The Council firmly believes that the greatest co-operation can be obtained only through a period of strict training. If they have accomplished this, success is theirs, as the fostering of co-operation and school spirit is much desired.
